Lists of coordinates of the boundaries of the maritime spaces of Togo

5 July 2019

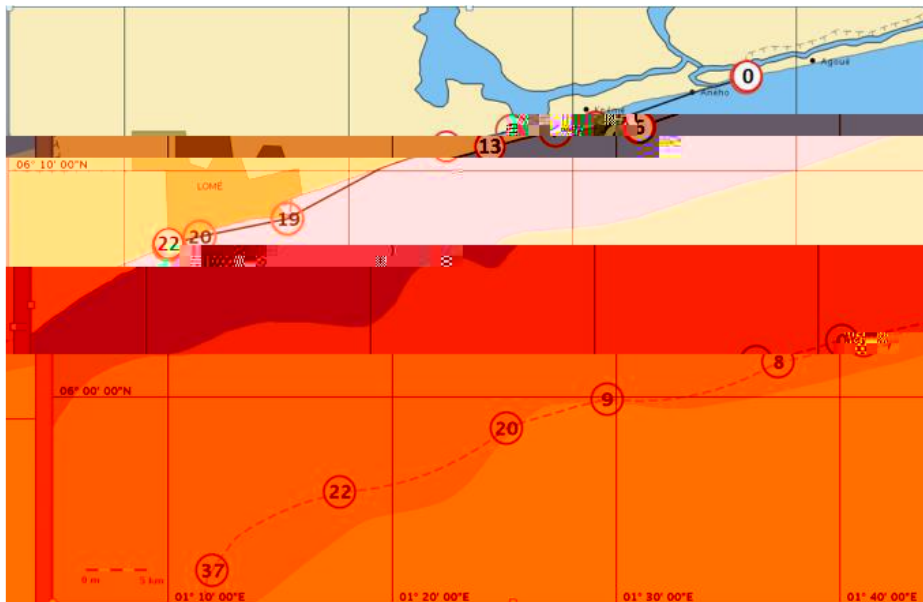

## Illustrations and coordinates of the baseline, territorial sea, contiguous zone and 200-mile limits of Togo

Notes:

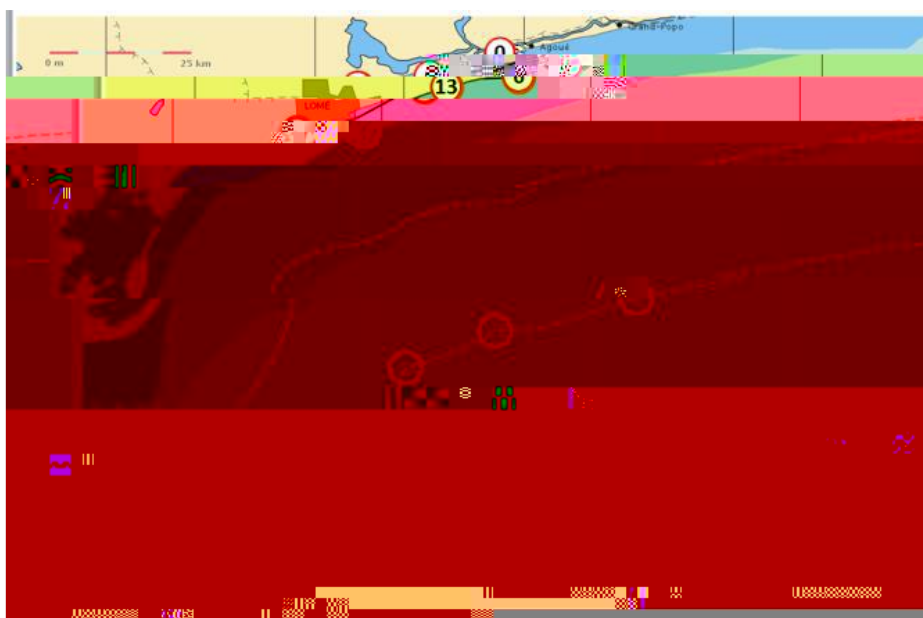

All coordinates are expressed in degrees, minutes, seconds and tenths of seconds in the World Geodetic System 1984.

The points contained in these lists correspond to the baseline, 12-mile wide territorial sea, 24-mile contiguous zone, and 200-mile limits, without prejudice to the lateral limits of maritime borders to be negotiated with neighbouring countries.
