Turkmenistan was the 'irst \$entral \*sian countr" to accede to the United Nations \$onvention on #ights o' ! ersons with isabilities @\$#! A in ) eptember 277B and rati'ied its %ptional ! rotocol in 2717. The , overnment o' Turkmenistan demonstrated its strong commitment to advancing human rights o' persons with disabilities @! 2 sA and not on!" maintained a range o' supports and services 'or ! 2 s inherited 'rom the ) oviet times but also extended them over the last "ears. /n the area o' social protection, 'or instance, the ) ocial ) ecurit" \$ode was amended in ecember 2711 that substantial!" increased bene'its and services 'or all categories o' ! 2 s.

2 hen the ! ro+ect was developed, it was clear that despite enhanced social bene'its and services, improved healthcare provision and introduction o' some elements o' inclusive education models, ! 2 s remain sociall" excluded. ) ocial exclusion, low educational attainment, unemplo"ment, low sel'4esteem and limited opportunities to participate in political and social li'e were 're3uent parts o' ! 2 s? dail" experience. The stereot"ping o' and pre+udice against ! 2 s were widespread and their 'amilies experienced social stigma. /n addition to disabilit"4speci'ic biases, women with disabilities 'aced gender stereot"pes when the" were seen as being primaril" responsible 'or domestic matters and child care, and men 'or providing 'inanciall" 'or the 'amil".

%ne o' important venues and mechanisms to change such dominant perceptions and eliminate barriers women with disabilities 'ace, is to have women with disabilities in leadership roles in multiple areas o' societ" who would be able to lead the change and a''ect views o' man" on disabilit". 2 hen the !ro-ect was designed women and girls with disabilities were not involved in decision making regarding planning o' di''erent programs and services 'or ! 2 s in Turkmenistan. The" o'ten experienced in'ormational and communicational isolation and had limited opportunities to be engaged into polic" dialogue with the , overnment.

The ! ro+ect ) ocial /nclusion through 9eadership ) kills 'or isabled 2 omen supported b" the United Nations emocrac" <und was implemented b" UN !, \$% Turkmenistan together with the ea' and (lind ) ociet" o' Turkmenistan (() TA during Can

The collected evidence demonstrates that the !rotect has achieved almost all o' its intended objectives. The announcement about the !roject was well received and that about 187 candidate have applied that demonstrates strong need among women with disabilities in such training opportunities. The trainings were conducted on the premises o' the )ocial #ehabilitation \$omplex o' () T where 66 participants 'rom regions were accommodated fother 11 women leaders were 'rom \*shgabatA. The trainings on democrac", the rule o' law, processes o' social polic" 'ormulation, /\$T, gender and practice their leadership skills in disabilit" organi&ations were provided. \* series o' stud" visits were organi&ed to ministries, universities, non4pro'it and business organi&ations, and municipal departments to meet with top level managers and discuss the roles o' managers and 'unctions o' di''erent agencies., uest speakers (top administrators and managers, law"ers, cultural workers, doctors, teachers, etc. A were also invited to meet with the !rotect bene'iciaries and speak about their leadership experience and pro'essional career. %ne o' the most important outcomes is that women leaders learned how to use the knowledge ac3uired in practical li'e situations to advance their human rights. ) ome o' them shared the knowledge ac3uired with other women with disabilities. /t helped them to mobili&e other women with disabilities and either to communicate their ideas to decision makers or establish their sel' help groups.

/n Cune 2(I) 2(a) -1.97266(T)1(h) -Th mc3w

The most important impact o' the ! ro-ect is that it helped women leaders to believe in themselves and built their sel'4advocac" skills so that man" o' them are not a'raid to advocate 'or themselves or on behal' o' others with decision makers at the national and local levels, business owners, in stores, hospitals, with social service providers and other 'ields. 9earning about gender, leadership,

• /t takes long time to change mindsets o' decision makers '

The easiest and one o' the most e''ective solutions would be to re3uire ministries and state agencies to procure goods and services directl" 'rom !%s without the tendering procedure. <or instance, () T has the necessar" modern e3uipment and well trained personnel to meet a number o' state needs @e.g., produce uni'orms 'or the arm", police, railwa", oil and gas companies.

UN! can provide its expert support in embedding evidence4based polic "making principles and practices in developing and implementing policies and programs supporting emplo "ment o'!2 s. UN! can strengthen capacit" o' respective line ministries b" providing trainings and seminars on practical aspects o' using data and evidence through all stages o' disabilit" polic "c"cle, including development o' polic "options, implementation and monitoring.

The consultant o''ers the 'ollowing recommendations 'or UN !E

- 8 & &(, iven the complexit" o' disabilit" polic" agenda and strong experience o' UN s"stem in implementing UN as %ne! rograms, it ma" be bene'icial to establish a high level \*dvisor" (oard with representation 'rom lead, overnment ministries and agencies, UN agencies and other donors to provide strategic guidance at the critical milestones o' the National isabilit") trateg" development. \$apitali&ing on UN partners? respective expertise and their comparative advantage, UN! ma" advance the coordination mechanism to ensure that supports o' disabilit" re'orms b" the UN s"stem are coordinated, comprehensive and executed in a time!" manner.
- A & % & 8 (

%ver the last ten "ears UN ! has collaborated extensivel" with () T that activel" promotes the interests o' visuall" and hearing impaired individuals that constitute onl" a segment o' all ! 2 s. The accurate data on disabilit" is needed not onl" to capture the real situation in the countr" but also to assess the real impact o' the , overnment actions advancing human rights o' ! 2 s at the household and individual level. . igh43ualit", comparable data on disabilit" is important 'or the planning, implementation, monitoring, and evaluation o' disabilit" 4'ocused policies and programmes. %ne o' potential solutions would be to include a block o' 2 ashington group 3uestions on disabilit" into the next national census. UN ! should not 'ocus solel" on improving the available statistical and administrative disabilit" data but support the , overnment in establishing mechanisms allowing the diverse disabilit" groups and individuals to be heard. In the short run it is criticall" important 'or public servants to learn how to conduct e''ective consultations with primar" 'ocus on identi'"ing the challenges that ! 2 s 'ace and 'inding toint potential solutions. \$apacit" building measures 'ocusing on state o''icials should demonstrate the value and bene'its o' consulting with ! %s and ! 2 s.

& ' - (\$hanges in public attitudes are necessar" to advancing the inclusion o'! 2 s. The right policies and strategies can be adopted but people?s belie's about individuals with disabilities determine how the" are treated in all aspects o' their lives. /' the public has charit" views o' disabilit" and believes that ! 2 s are incapable o' 'ull participation in societ", these attitudes shape the processes o'! 2 s? inclusion in societ". The consultant strongl" recommends implementing diverse awareness4 raising campaigns at the national and local levels to rein'orce the positive image o'! 2 s as holders o' all the human rights and to break down cultural barriers and pre•udices against

persons with disabilities. The media should be encouraged and trained to portra" ! 2 s 'rom the perspective o' social and human rights model o' disabilit".

UN! is well positioned to develop and implement on4line and 'ace to 'ace training on UN \$#! and state obligations, including how to mainstream disabilit" into ministr" policies and programs. \*Il the current and newl" recruited sta'' in relevant ministries should undertake mandator" courses aimed at raising their awareness on disabilit". The consultant believes that additional training on how to write e''ective disabilit"4'ocused polic" papers and other documents can be developed and delivered b" UN!

- 1 & (UN!is implementing a ! ro-ect Improving Energy Efficiency in the Residential Buildings Sector of Turkmenistan. Through this ! rotect at least 87 architects and for engineers have been trained on energ" e''icient building reconstruction. \*s UN ! established good relations with the architects, it ma" bene'icial to explore a possibilit" o' implementing a oint ! roect 'ocusing on developing and en'orcing accessibilit" standards, at least in the area o' construction. National building codes were revised to re3uire minimum standards o' access and were applied to all buildings at the time the" were being built and during mator renovations irrespective o' ownership. espite signi'icant progress made in improving accessibilit", the consultant 'inds that Turkmenistan does not have e''ective mechanisms 'or overseeing and evaluating compliance with buildings? accessibilit" legislation. /t remains unclear i' sanctions 'or non4 compliance are imposed i', 'or instance, newl" constructed buildings do not meet the accessibilit" standards. The consultant advises to legislate an oversight mechanisms and means o' penali&ing non4compliance, in consultation with !%s, which should participate in monitoring implementation o' accessibilit" standards.
- \$ & '- (isabilit"4related issues should be considered when designing all UN! projects and programs. This can be done b" engaging! 2 s in the project design phase, the design o' speci'ic interventions, and5or implementing a 3uota 'or bene'iciaries who are! 2 s in each project. <or instance, UN! interventions in the area o' disaster risk reduction can take into account speci'ic needs and circumstance o'! 2 s and strengthen their resilience and better prepare them 'or potential disasters.
- & &? (The outcomes and impacts o'! rotects supporting! 2 s ma" be di'icult to measure as some

Turkmenistan was the 'irst \$entral \*sian countr" to accede to the United Nations \$onvention on #ights o'! ersons with isabilities (UN \$#! A in ) eptember 277B and rati'ied its %ptional! rotocol in 2717. The \$onvention is a comprehensive document that contains 87 articles. It is grounded in the premise that public authorities should go 'urther than to tust help persons with disabilities ! 2 sA to adtust to existing conditions! the should seek to adapt the conditions in order to accommodate ever one, including those with special needs. \*Ithough the UN \$#! does not include specific 'eatures ensuring strict domestic compliance, governments are re3uired to demonstrate good 'aith e''orts to progressivel achieve their obligations, and to demonstrate the use the maximum resources available? in this regard. The rati'ication o' UN \$#! makes governments answerable to international bodies 'or its disabilities laws and policies and demonstrate how the values, principles and rules o' UN \$#! are moving countries? laws and polic 'orward. The governments are also assuming their responsibilit" to revise all the relevant laws, policies, and practices to ensure that that the do not even unintentional discriminate against persons with disabilities

Turkmenistan?s demons4640(t) - 2() - 2(p)6(e) - 4(-2() - 2(7266(T)1) 2(b) - 4(i) 24(n) - 4(s46u(i) 24(n) - 2(b) - 4(i) 24(n) - 4(s46u(i) 24(n) - 4(s46u(i)

The" o'ten experienced in'ormational and communicational isolation and had limited opportunities to be engaged into polic" dialogue with the , overnment. 2 omen with disabilities lacked advocac" and negotiation capacit" within the disabilit" organi&ations as well. The ea' and (lind) ociet" o' Turkmenistan () () TA that was a main! ro+ect partner, 'or instance, is a well established disabilit" organi&ation in the countr" that pla"s active role in advocating 'or! 2 s. \*Ithough about hal' o' its members were women onl" a 'ew o' them occupied management positions that limited their abilit" to communicate women4speci'ic perspectives and ideas to () T leadership and, overnment decision makers.

## )() ! & 1

The !ro+ect ) ocial /nclusion through 9eadership ) kills 'or isabled 2 omen supported b" the United Nations emocrac" <und was implemented b" UN !, \$% Turkmenistan together with the national partner () T during Canuar" 2716 D Cune 2718. The () T, which is a non4governmental organi&ation with ob-ective to protect the rights and interests o' the hearing and visuall" impaired people, 'acilitate social rehabilitation and integration and provision o' emplo"ment services. The selection o' () T was well +usti'ied as this organi&ation had extensive experience on multiple pro-ects with UN ! and other international partners in advancing rights o'! 2 s and is well positioned to advocate 'or legislative and polic" changes. The () T was involved in particular in a pro-ect championing revisions o' national legislation in order to ensure its compliance with UN \$#!.

The overall objective of the !roject was to promote engagement of women with disabilities in polic" making. Targeting hearing and visuall" impaired women in the () The !roject focused on expanding knowledge of hearing and visuall" impaired women on democratic institutions, modern socioleconomic political processes, gender issues and computer skills.

The !ro-ect correctl" identi'ied three main barriers that women with disabilities 'aceE lack o' management capacit" and skills, gender discrimination and lack o' access to in'ormation in an appropriate 'ormat. The !ro-ect 'ocused speci'icall" on hearing and visuall" impaired women, with three main ob-ectivesE

- %utcome 1E Fnowledge o' hearing and visuall" impaired women has increased in terms o' in democratic institutions, modern socio4economic4political processes, gender issues and computer skills.
- %utcome 2E Management capacit" and leadership o' skills o' hearing and visuall" impaired women raised and number o' women with disabilities taking managerial positions inside the () T increased.
- %utcome 0E . earing and visuall" impaired women pla" an active role inside the () T and in the polic" dialogues with government.

2 ithin the UN ! \$ountr" !rogram \*ction !lan @\$!\*!A the !ro+ect contributed to the %UT\$%M-2.1E The government ensures comprehensive socio4economic integration o' all vulnerable groups including women, disabled and ./VO persons.

The ! rotect adopted a logical and comprehensive approa

meetings with representatives 'rom di''erent organi&ations and 'orum discussions to help the ! ro+ect bene'iciaries to master core leadership skills. More speci'icall", the ! ro+ect 'ocused on

%utcome 1E Fnowledge o' hearing and visuall" impaired women and their access to in'ormation has increased on democratic institutions, modern socio4economic4political processes, gender issues and computer skills.

To achieve %utcome 1, the !ro+ect was planning to train 88 visuall" and hearing impaired women in politics, socioeconomics and /\$T. /n addition to o''ering 'ormal training courses comprised o' 'our themesE democratic institutions, modern socio4economic and political processes, gender and women leadership, and computer skills, the !ro+ect planned to invite ()T to share in'ormation with women leaders about its activities, challenges, perspectives and plans.

) even training courses §8 'or visuall" impaired women and 2 'or hearing impaired womenA with one month duration §18 da"sA were planned to be delivered b" local consultants. ) peci'ic themes includedE

emocrac" and national legislation @\$onstitution, )ocial )ecurit" \$ode, etc.A, the UN

and demonstrate how disabilit" issues might be interconnected with purpose and tasks o' those organi&ations. 2 omen with disabilities were supposed to appl" their knowledge and skills in preparing 'or these meetings and demonstrate their presentation skills as well as abilit" to 'ormulate and deliver ke" messages to stakeholders. Through the meetings and visits, women leaders were supposed to establish new relationships with other leaders, pro'essionals, and researchers, which will be help'ul in their career o' leaders. /t was planned to organi&e 'ollow up discussions with stud" visit participants to identi'" the most important and relevant lessons the" learned.

() T was expected to organi&e meetings with a central apparatus o' () T, heads o' departments and 'acilities to share in'ormation with women leaders about its activities, challenges, perspectives and plans and demonstrate its 'acilities. /t was supposed to result in discussions o' activities that would address speci'ic needs and aspiration o' women () T members with () T leadership.

The !ro-ect was planning to support participation o' women leaders in regional events and stud" visits to disabilit" organi&ations in other countries. ) uch an international exposure was supposed to provide women leaders with the experience at the international level and 'irst hand experience o' activities o' women with disabilities? work in other countries and establish connections with other leaders, pro'essionals, and researchers, who would be valuable sources o' in'ormation and expertise 'or 'uture cooperation.

%utcome 0E . earing and visuall" impaired women pla" an active role inside the () T and in the polic" dialogues with government.

To achieve %utcome 0, the !ro+ect planned to involve women leaders into discussion events @small 'orumsA b" identi'"ing short and long term priorities in terms o' aA personal development, bA participation in activities o' disabilit" or other organi&ations, and cA the most important issues the "are going to discuss during small 'orums. The !ro+ect manager was expected to assist women in selection o' a common theme and 'orm o' discussion and development an agenda as well as supporting women presenters.

\$apitaliking on ke" 'indings and lessons learned 'rom small 'orums, the ! ro+ect was planning to conduct national 'orums on issues o' women leadership and social inclusion. The 'orum was supposed to include participants 'rom all regions o' the countr" and, in addition to women leaders, include representatives 'rom companies, ministries, governmental agencies, and nonpro'it organikations. 2 omen leaders were expected to identi'" themes 'or national 'orums through a 3uestionnaire. ! articipation in this activit" could have both strengthened capacities o' women leaders with disabilities in organiking an event at the national level and 'ormulating and communicating their ideas and aspirations to decision makers.

The ! ro+ect document identi'ies a number o' risks and contains some corresponding mitigation strategies. /t was believed that some women would not able to come 'or a whole month to \*shgabat and it was planned that () T would explain the bene'its o' training course and other ! ro+ect activities to increase women motivation. /t was planned to develop an alternative list o' participants to replace potentiall" those women who would not be able to attend or would change their mind. \*nother risk was that no 3uali'ied trainers would be available. To address it, it was

planned to widel" disseminate T%#s among high schools and universities and o''er 'lexible schedule o' training courses. The risk o' limited availabilit" o' guest speakers was planned to address b" o''ering maximum 'lexibilit" to speakers.

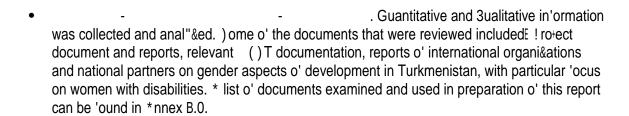

This evaluation took place immediatel" a'ter the !ro-ect completion. /t is the expectation that its 'indings and recommendations will be used b" UN ! and ke" !ro-ect stakeholders to in'orm their 'uture work in advancing human rights o' persons with disabilities in Turkmenistan.

The consultant 'ollowed the guidance provided in United Nations - valuation , roup Gualit" \$hecklist 'or - valuation #eports. The 'ollowing guiding principles 'or the evaluation process and outcomes were adopted so that its outcomes are.

their ministries in the area o' disabilit". There was a real change in mindsets o' ministr" sta'' and decision makers who met with women with disabilities and heard 'rom them directl" about challenges the "aced and solutions the proposed. ) tate o''icials and leaders o' diverse organi&ations learned that persons with disabilities are the same people as persons with no disabilities who would like to stud", get good +obs, get married and pursue other opportunities in li'e and that societ has to do much more than it is doing now to help them achieve their goals.

Man" ! ro-ect bene'iciaries due to the burden o' double discrimination, lack o' awareness, and di''icult circumstances had low sel'4con'idence and little hope 'or change be'ore the ! ro-ect implementation. ! 2 s are at increased risk 'or academic 'ailure, social di''iculties, ps"chological problems, prolonged dependence on parents or guardians, and emplo"ment di''iculties. . ow to measure the impact o' the ! ro-ect that addressed leadership, sel'4con'idence and communication skills o' women with disabilitiesR Traditional measures such as a number o' women who got emplo"ed due to ! ro-ect intervention or a number o' recommendations communicated and accepted b" decision makers do not capture the breadth o' the ! ro-ect impact.

To unpack other e3uall" important ! rotect impacts, the consultant examined how the ! rotect changed mindsets and li'e approaches o' its bene'iciaries. /nterviews and 'ocus groups demonstrated that man" women with disabilities overcame man" challenges the 'aced and achieve positive outcomes in their lives that is captured b" the term Iresilient.

The" improved sel'4awareness or awareness o' their strengths and weakness and acceptance o' their disabilit" and became proactive @active engagement in the world around them and belie' in the power to control their own destin". Numerous stories demonstrated that man" women with disabilities became more persistent in the 'ace o' adversit" and 'lexible in pursuing alternate strategies to reach a goal. The 'ocus groups participants clear!" identi'ied their speci'ic "et 'lexible goals and outlined strategies to reach them b" rel"ing on social support s"stems that included some women met through the trainings. The consultant was particular!" impressed to see positive temperament and strong sel'4esteem o' women leaders that were built5strengthened through the ! ro+ect.

The most important impact o' the ! ro+ect is that it helped women leaders to believe in themselves and built their sel'4advocac" skills so that man" o' them are not a'raid to advocate 'or themselves or on behal' o' others with decision makers at the national and local levels, business owners, in stores, hospitals, with social service providers and other 'ields. ) el'4advocac" re'ers to an individual's abilit" to e''ectivel" communicate, conve", negotiate or assert his or her own interests, desires, needs, and rights. /t involves making in'ormed decisions and taking responsibilit" 'or those decisions. %ne women leader told the evaluator that she is not a'raid to tell in the hospital that she has the same rights as ever"bod" else and will wait in line but will demand the same services that are provided to non4disabled individuals. The ! ro+ect provided women with disabilities with opportunities to learn, 'oster their sel'4con'idence, motivation and leadership skills so that the" can exploit their potential and lead other ! 2 s.

9earning about gender, leadership, government operations and /\$T gave the !ro+ect bene'iciaries the tools and experience to take greater control over their own lives and engage into multiple level advocac" work. %ne o' !ro+ect bene'iciaries open!" communicated her 'amil" housing problems to the Me+lis \$hairwoman who active!" engaged local and cit" authorities into its e''ective resolution.

The consultant heard 'rom man" women leaders and other partners about one ! ro-ect bene'iciar" with visual impairments who was admitted as a 'ull time student to the (elarusian ) tate

•

- ! rograms to address disabilit" and gender issues need to be designed 'or both maximum reach and broad accessibilit". <ocus on a limited number o' bene'iciaries will not lead to s"stemic changes.
- 2 omen with disabilities are not a homogenous group. 2 omen with ph"sical and sensor" disabilities o'ten have di"erent needs than women with intellectual and ps"chosocial disabilities.
   2 omen living in urban areas ma" have di"erent priorities than women in rural areas.
   Understanding the individual characteristics o' individuals with disabilities is a crucial 'oundation 'or supporting them well. ) uch diverse 'actors as age, gender, and ethnicit" amil"

agreed plan o' actions to promote human rights o' ! 2 s in Turkmenistan that should be aligned

potential problems as duplication o' supports and services, cost ine''ectiveness, and inaccessibilit"

provisions regarding the labour rights o' persons with disabilities, including the prevention o' discrimination against workers with disabilities. <or instance, the emplo"ers have to 'ul'il the recommendations o' the medical4labour commissions with regard to ! 2 s such as reduced work hours without loss o' wages, reduced workload, and other measures outlined in the individual rehabilitation plans. <sup>17</sup> /n accordance with \*rticle 1B o' the 9aw o' Turkmenistan \$%n - mplo"ment\$ emplo"ers are re3uired to designate a particular percentage o' +obs 'or ! 2 s and in'orm about these vacancies local emplo"ment centres.

\*ccording to the ) ocial ! rotection \$ode, ! 2 s have the right to be gain'ull" emplo"ed and the emplo"er cannot re'use to enter into an emplo"ment contract or promote a ! 2 , re4assign him5her or terminate the emplo"ment contract with the exception o' those cases where the individual?s health condition prevents the execution o' pro'essional duties, or threatens the health and sa'et" o' others. The law speci'ies that enterprises, organi&ations and institutions are re3uired to establish the necessar" conditions in accordance with the individual programs o' rehabilitation to enable ! 2 s to work. -nterprises, organi&ations and institutions are also re3uired to have 3uotas o' +ob positions 'or ! 2 s.11

<or man" ! 2 s, work is ke" to economic independence, health and well4being and 'ull participation in the communit". Under the socialist s"stem a 'ter receiving education in segregated speciali&ed schools, man" o' those who were blind, dea', or had less serious disabilities were emplo"ed in state4'unded sheltered enterprises, or in home4based work. Through the interviews and 'ocus groups, the consultant learned that there are signi'icant gaps between the legislation and policies and realities 'aced b" ! 2 s in the 'ield o' emplo"ment. Turkmenistan is a societ" that still considers providing emplo"ment opportunities 'or people with disabilities an act o' charit" rather than a right governed b" international and national law. -mplo"ment is not onl" economicall" important 'or ! 2 s as it helps to increase their incomes but it also a means to improve sel'4worth and social acceptance and respect. The importance o' ensuring access to the +ob market 'or vulnerable groups, including ! 2 s was emphasi&ed during the post42718 National \$onsultations in Turkmenistan.<sup>12</sup>

-mplo"ment involves matching potential emplo"ees with +ob opportunities. /' a ! 2 who is looking 'or a +ob cannot 'ind one, the reasons ma" lie with the emplo"ee, with the emplo"er, with +ob opportunities, or with the mechanisms that match the two sides together. To promote emplo"ment o' ! 2 s, all these areas have to be addressed simultaneous!". The consultations with ke" stakeholders, including ! 2 s themselves, con'irmed that the "'ace multiple barriers to emplo"ment.

! 2 s need individuali&ed support that meets their strengths and needs as well as local economic conditions. \*n individual plan o' emplo"ment support should be developed 'or them that takes into account such individual characteristics as age, skills, special needs and the emplo"abilit" o' ! 2 s,

17

and local tob market conditions. 10 \*s international experience demonstrates, individualiated approaches are ellective in addressing barriers to labour market inclusion that each ! 2 laces. The plans could contain various rehabilitation and work elements such as the assessment o' pro'essional skills, career guidance and counselling, restoration o' pro'essional skills and development o' new pro'essional skills, as well as bene'its in cash and kind.16 The plan can include specific commitments for the ! 2 that he or she can sign and include a re3uirement for periodic 'ollow4up meetings with caseworkers. /ndividuali&ed approaches can also include a series o' activities to help build the sel'4esteem, con'idence and resilience o' ! 2 s. To ensure that the individuali&ed plans work, it is necessar" to clear!" delineate responsibilities o' line ministries 'or education, vocational training, customiled rehabilitation services, etc. so that the supports and services are comprehensive and well4coordinated to prepare ! 2 s 'or emplo"ment. The 'ocus groups and interviews provided the consultant with substantial evidence that the women with disabilities looking 'or tobs do not know who to turn to as it is unclear which ministr" and respective service provider is responsible 'or vocational training, apprenticeships, and education o' ! 2 s. \*s a result, man" o' the ! roject bene'iciaries had to use their own 'unds to obtain the necessar" training or relied on 'ree training services provided b" such organi&ations as the #ed \$rescent to ac3uire the necessar" skills.

The 'ocus groups con'irmed that o'ten medical4social commissions unnecessar" restrict a range o' occupations that ! 2 s can pursue. \*s a result, some women with disabilities who were willing to and capable o' per'orming some +obs could not appl" 'or them nor pursue the re3uired educational and pro'essional training opportunities.

- mplo"ment on the open market is the ideal option but a lot o' 'actors have to be addressed to make it work 'or all ! 2 s in Turkmenistan. There is a range o' legislative and polic" options that UN! and the Ministr" o' 9abour and ) ocial! rotection can explore to promote emplo"ment opportunities o'! 2 s in TurkmenistanE<sup>18</sup>

contribute to it. /t is important to clear!" outline th

\$riticall" review the e"ectiveness o' the current incentives 'or emplo"ers to hire and maintain
 ! 2 s emplo"ed. /t ma" be bene icial to explore i' the corporate income tax incentives to emplo"ers work and examine a need o' extending tax exemptions to imported products, devices or e3uipment and training materials used b" ! 2 s at work.

The easiest and one o' the most e''ective solutions would be to re3uire ministries and state agencies to procure goods and services directl" 'rom !%s without the tendering procedure. <or instance, () T has the necessar" modern e3uipment and well trained personnel to meet a number o' state needs @e.g., produce uni'orms 'or the arm", police, railwa", oil and gas companiesA. F"rg"&stan, 'or instance, has a 9aw on public procurement o' products o' associations o' disabled persons. The 9aw re3uires state entities to place their orders 'or procurement o' goods without application o' the tendering procedure with associations o' persons with disabilities.

UN! is well positioned to partner with the Ministr" o' 9abour and ) ocial! rotection on cost sharing basis to review the current emplo"ment supports s"stems, including vocational rehabilitation and training o'!2 s, tax incentives 'or emplo"ers, en'orcement o' the 3uota s"stem and other mechanisms to increase emplo"ment opportunities o'!2 s. \* +oint potential! ro+ect o' the Ministr" and UN! ma" 'ollow these stepsE

- 1. /denti'" the main barriers to emplo"ment 'aced b" ! 2 s rel"ing on the in'ormation available 'rom multiple partners. \$onduct roundtables and other 'orms o' consultations with stakeholders and ! 2 s across the countr" to con'irm that the challenges identi'ied re3uire nation4wide interventions.
- 2. %nce the consultations identi'" main barriers, decide on the polic"5program instrument to use to address these barriers. evelop polic"5programmatic solution and obtain the , overnment approval.
- 0. ecide who will be responsible 'or its implementation, including eligibilit" criteria, deliver" mechanisms, capacit" building interventions, 'unding and accountabilit" re3uirements and monitoring o' per'ormance mechanisms.

UN! can provide its expert support in embedding evidence4based polic"making principles and practices into developing and implementing policies and programs supporting emplo"ment o'! 2 s. /n Turkmenistan, the evidence is not su''icientl" used in the polic" development process through its core stages and UN! can strengthen capacit" o' respective line ministries b" providing trainings and seminars on practical aspects o' using data and evidence through all stages

In a case o' complex services such as emplo"ment support o' ! 2 s where multiple interventions could be implemented depending on bene'iciar"?s circumstances and where multiple partners could be involved, it is advisable 'or the Ministr" to pilot new services to test and 'ine tune new models.

UN! ma" help to choose pilot sites that should be representative o' the realities o' Turkmenistan and re'lect such main 'actors as geograph", income levels, unemplo"ment levels, and gender

The media should be encouraged and trained to portra" ! 2 s 'rom the perspective o' social and human rights model o' disabilit". The media in'ormation awareness4raising campaigns about the rights o' ! 2 s should be extended and include participation o' ! 2 s in talk shows, regular television and radio programmes.

The ! ro-ect bene iciaries and man" national stakeholders, including partners in ke" ministries, demonstrated their knowledge o' the social and human rights models o' disabilit". In the social model, disabilit" is seen as the result o' complex interactions between a health problem or a 'unctional limitation and the social, political, cultural, economic, and ph"sical environment. These, in combination with personal 'actors such as age, gender, and level o' education, can result in a disadvantage L that is, a disabilit". Under this approach, the disabilit" 'ocus is no longer how to provide 'or those deemed SunableS to integrate into mainstream societ", but rather how to make societ" accessible to all, on an e3ual and non4separate basis. 2 hatever the nature o' disabilit", the basic principles o' the social approach to disabilit" adopted b" the United Nations places responsibilit" on societ" to provide an enabling environment b" removing the ph"sical and social barriers to participation in ever"da" li'e in order 'or all

and belie's. /t is advisable to be creative and innovative and expand the currentl" used obtectivel" veriliable indicators to collect evidence pertaining to results. ) urve"s o' bene'iciaries and partners ma" be regularl" conducted to capture the impact at the levels o' ultimate bene'iciaries. The" will help to 3uantitativel" assess levels o' changes in the areas that ma" be di'icult to capture through other evaluation instruments. To assess impact o' trainings provided, 'or instance, it ma" be bene'icial to conduct two surve"sE one immediatel" a'ter the completion o' training and another some time later to examine i' the bene'iciaries use the knowledge obtained and skills gained.

The consultant strongl" advises to develop elaborate logrames 'or all ! rotects supporting persons with disabilities. The main intended outputs, activities, results and objectivel" veriliable indicators should be ade3uatel" de'ined, appropriate and stated in measurable terms.

The pro-ect ) ocial /nclusion through 9eadership ) kills 'or isabled 2 omen supported b" the United Nations emocrac" <und was implemented b" UN !, \$% Turkmenistan together with the national partner ea' and (lind ) ociet" o' Turkmenistan () () A during Canuar" 2716 D Cune 2718. The overall ob-ective o' the pro-ect is to promote engagement o' women with disabilities in development polic" making. <ocusing on hearing and visuall" impaired women in the Turkmenistan ea' and (lind ) ociet" () () TA which is one o' the one o' the 'ew established disabilit" organi&ations in the countr" and a leading organi&ation advocating 'or people with disabilities, the pro-ect will expand knowledge o' hearing and visuall" impaired women in democratic institutions, modern socio4economic4political processes, gender issues and computer skills.

The project 'ocused on the 'ollowing outcomesE

- 0 + Fnowledge o' hearing and visuall" impaired women has increased in terms o' in democratic institutions, modern socio4economic4political processes, gender issues and computer skills.
- 0 ) Management capacit" and leadership o' skills o' hearing and visuall" impaired women raised and number o' women with disabilities taking managerial positions inside the () T increased.
- 0 6 . earing and visuall" impaired women pla" an active role inside the () T and in the polic" dialogues with government.

2 ithin the UNDP Country Program Action Plan (CPAP) the !ro+ect contributed to the %UT\$%M- 2.1E The government ensures comprehensive socio4economic integration o' all vulnerable groups including women, disabled and ./V0 persons.

The overall idea was that a gradual approach 'rom receiving substantive knowledge on democrac" and institutions, gender and leadership to practical exercises during meetings with representatives 'rom di''erent organi&ations and 'orum discussions will increase leadership capacit" o' hearing and visuall" impaired women.

The pro-ect 'ocused on developing the leadership skills o' the women with disabilities improving their capacit" o' advocac", networking, discussion and presentation, as well as abilit" to 'ormulate and deliver ke" messages to stakeholders to promote rights and needs o' women with disabilities.

The" will be encouraged to pla" an active role inside the disabilit" organi&ations and be engaged in the polic" dialogues with government.

The project strateg" took a three4prong approach b" 'ocusing on capacit" building on communications, advocating and networking o' women managers with disabilities, providing them opportunities 'or practicing leadership skills, and expanding knowledge o' women with disabilities. <irst, the project activities created opportunities 'or hearing and visuall" impaired women that were selected 'rom the 8 regions o' the countr" to obtain new knowledge on democrac", the rule o' law, processes o' social polic" 'ormulation, gender and practice their leadership skills in disabilit" organi&ations.) econdl", the project 'ocused on capacit" building on communications, advocating and networking o' women managers with disabilities and promoting more women with disabilities to take managerial positions inside the disabilit" organi&ation. Thirdl", the protect created opportunities 'or hearing and visuall" impaired women to practice their leadership skills in disabilit" organi&ations and 'or to increase their engagement in polic" dialogues through organi&ing meetings and 'orum discussions with representatives o' relevant polic" makers and national stakeholders. uring the project; small groups o' women @14BA were selected 'rom the di''erent regions @provincesA o' Turkmenistan including \*shgabat to participate in 1 month training sessions on the above mentioned topics. <or this purpose, trainers on each o' the topic were hired. This approach 'illed the knowledge gaps and helped build women?s capacit" and con'idence 'or reali&ing their leadership roles and expanding opportunities 'or them to be a part o' mainstream societ" and promote the rights o' women with disabilities.

/nteractive design o' trainings provided participants an opportunit" to participate in discussions, share their points o' view and experience, and give small speeches and presentations on some themes. The training programs were designed b" local pro'essionals to increase women?s knowledge about democratic principles, the rule o' law in practice, polic" making processes. Training courses 'ocused on the 'ollowing topicsE aA democrac" and national legislation, the UN \$onventions, the governmental arrangement and institutions, concept o' civil societ"H bA modern social, economic, and political processes in the countr" and some international trendsH cA gender

\*'ter completion o' the training course, training participants organi&ed a <orum on !romotion o' opportunities 'or emplo"ment o' people with disabilities !) ocial integration o' people o' disabilities through participation in activities o' public disabilit" organi&ations.

The pro-ect also opened a hot line that worked 8 da"s per week providing consultations and assistance to hearing and visuall" impaired women on di"erent issues, including health services, social wel'are, placement o' disabled children in the special schools, emplo"ment opportunities, etc. /n accordance with the Article 9, part c) valuation o' the !ro-ect ocument signed +ointl" b" UN !, UN -<, and ea' and (lind) ociet" o' Turkmenistan The UN! in Turkmenistan is responsible 'or conducting an evaluation at the end o' the pro-ect. U This evaluation should be carried out b" an independent and external entit". UN -< will also liaise with the -\*, as necessar", to determine the best course 'or conducting evaluations.

(

The purpose o' the evaluations is to undertake in4depth anal"sis o' the project in order to determine whether the project has achieved its planned outcomes. The evaluation should also 'ocus on determining whether all planned outputs were delivered and whether the" were delivered in an e''ective and e''icient manner.

-valuation, even when critical, needs to be constructive. \*s much attention is to be paid to positive points and conclusions as to identi'ied weaknesses and 'ailures. This point is not onl" a 3uestion o' objectivit" it is also a basic condition 'or the evaluation report to be accepted b" all concerned parties. The basic goal o' an evaluation is a balanced set o' conclusions and recommendations b" which all stakeholders will be willing to stand in the interests o' advancing the broad goals that gave rise to the project. -valuation is not just an audit o' past per'ormance. Thus, one o' the major purposes o' the evaluation is to identi'" the lessons learned that provide the in'ormation 'or the 'uture projects in the same area.

The evaluation should cover the pro-ect ) ocial /nclusion through 9eadership ) kills 'or isabled 2 omen implemented b" UN ! during the period o' Canuar" 2716 D Cune 2718 based on the !ro-ect ocument signed b" UN -<, UN !, and ea' and (lind ) ociet" o' Turkmenistan.

The preparation o' evaluation 3uestions should be based on anal"tical work conducted b" the expert during the preparation phase, when the project?'s objectives and strateg" are reconstructed 'rom project documentation.

The evaluation 3uestions should include, but not be limited to the 'ollowingE

- To what extent was the project implemented as envisaged b" the project documentR /' not, wh" notR
- 2 as there a reasonable relationship between project inputs and project outputsR
