The United Nations Environment Programme (UNEP) has been promoting sustainable development and use of the marine and coastal areas by integrating the three pillars of sustainable development: environmental, social and economic pillars.

i) Relevant Activities

UNEP is a coacilitator the Technical Support Team (TST) for Goaddean SDG, and participated in a workshop on developing integrated indicators for this SDG as well as linking Goal 14 with other relevant SDGs. At this workshop 4? Integrated indicators were drafted to demonstrate the integration of the three pillars:

Indicator 1: Small -Scale Fisheries

% or # of smalleale fisheries (as per FAO), including the actors along the value

- ensuring access and benefit sharing -

UNEP has compiled and collated information on the indicators or index used in the Regional Seas Conventions and Action Plans and has published a report: Measuring

frameworks are developed and exchange of best practice sumptime degional level, adoption of tools and policy framewhold f

The major challenges include the human and financial resources needed to support the activities that are proposed and needed for integration. Other challenges include clarification of mandates among the agencies, and the lack of linked Programmes of Work among the agenciesaking it difficult to coordinate joint work of the agencies.
