It is also important to note that the United States has been a leader in the development of international environmental law, particularly in the area of climate change. The US has played a key role in negotiations such as the UN Framework Convention on Climate Change (UNFCCC) and the Kyoto Protocol. The US has also been a strong advocate for the Paris Agreement, which aims to limit global warming to well below 2 degrees Celsius above pre-industrial levels.

For example, if we consider the function  $f(x) = \sin x$ , we can see that the function oscillates between -1 and 1. This means that the function has a range of  $-1 < f(x) < 1$ . The function is periodic with a period of  $2\pi$ .
