# Projecting fertility in the 2000 Revision

\_\_\_\_\_

# Projecting fertility in the 2000 Revision

\_\_\_\_\_

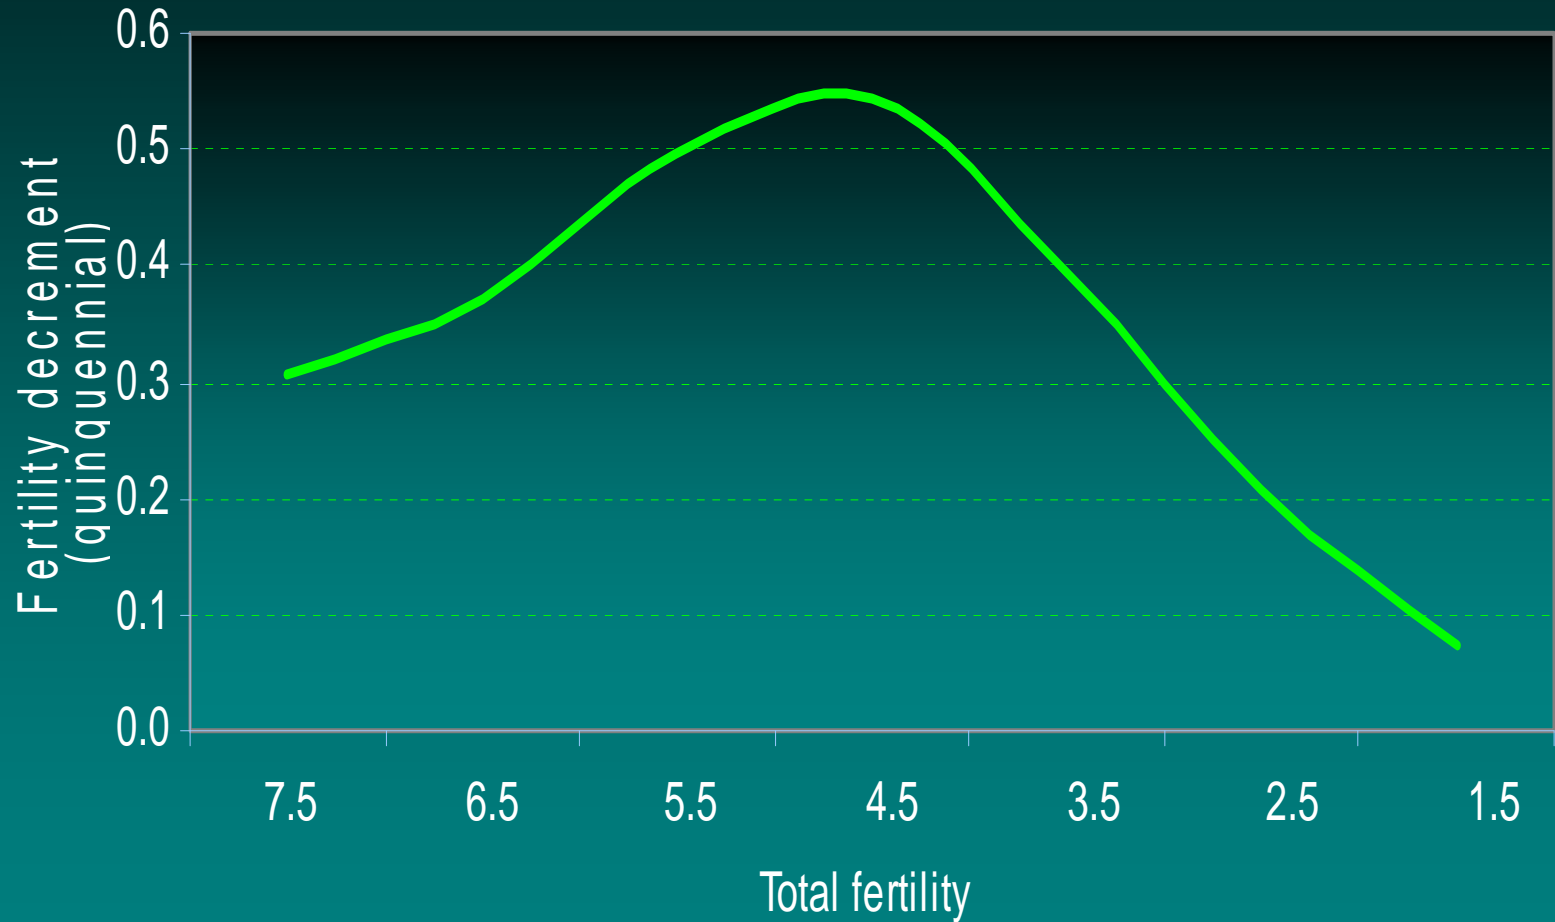

# Fitting the relation between total fertility and fertility decrements

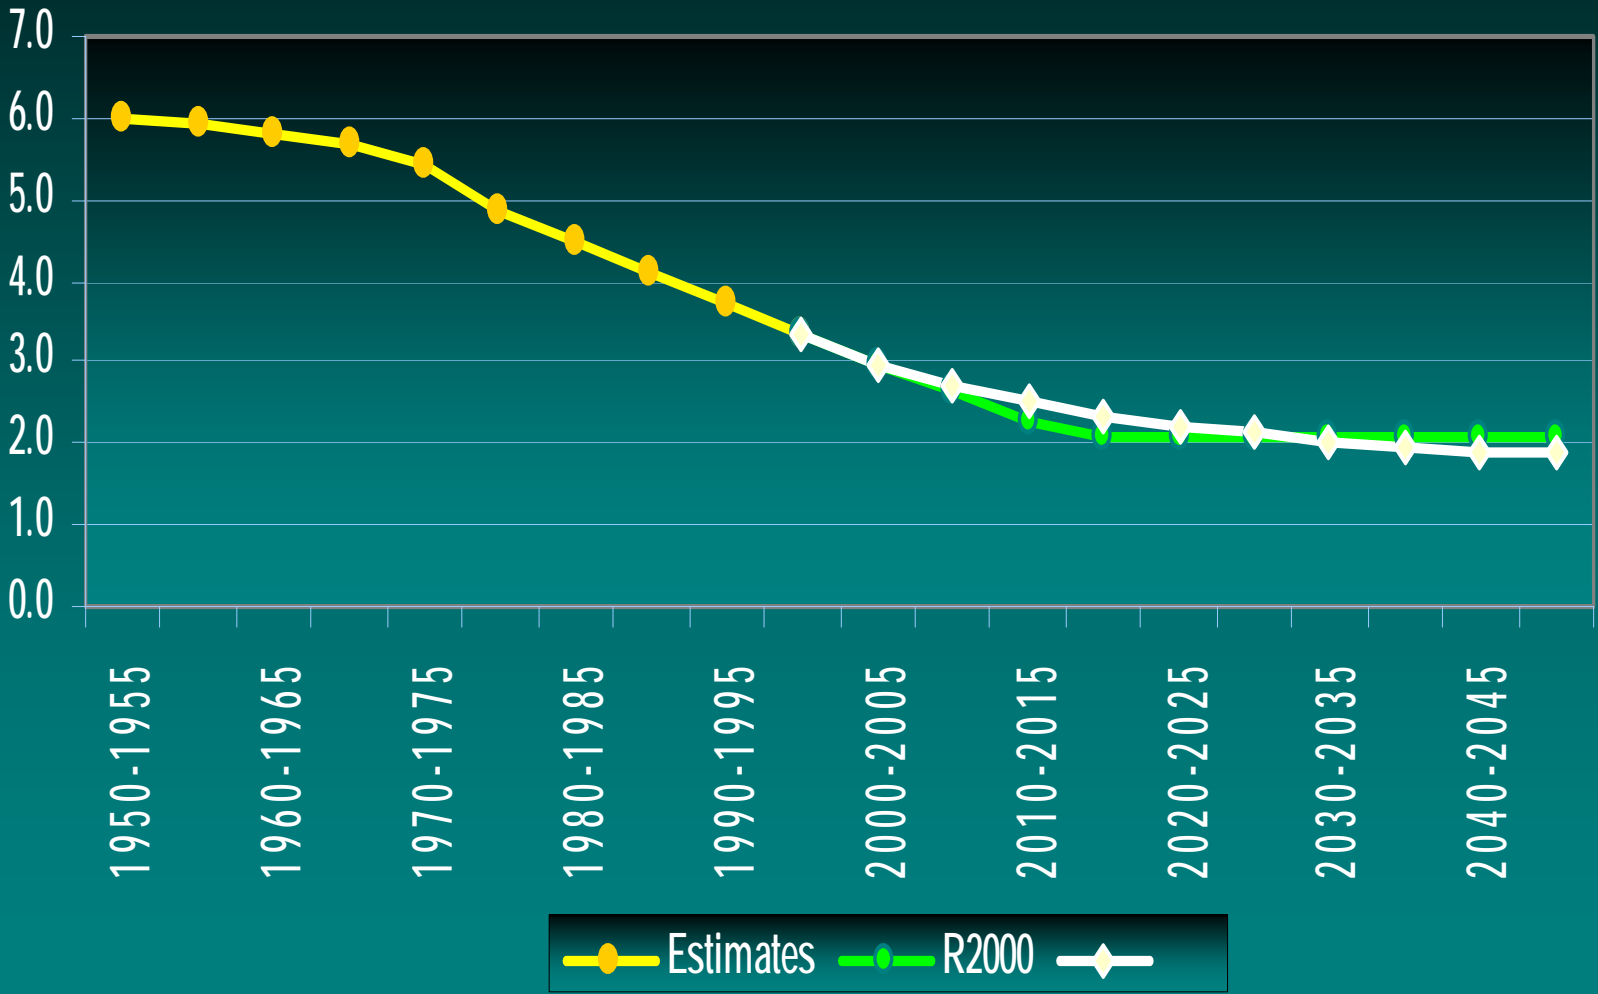

# Median, used in 2002 Revision

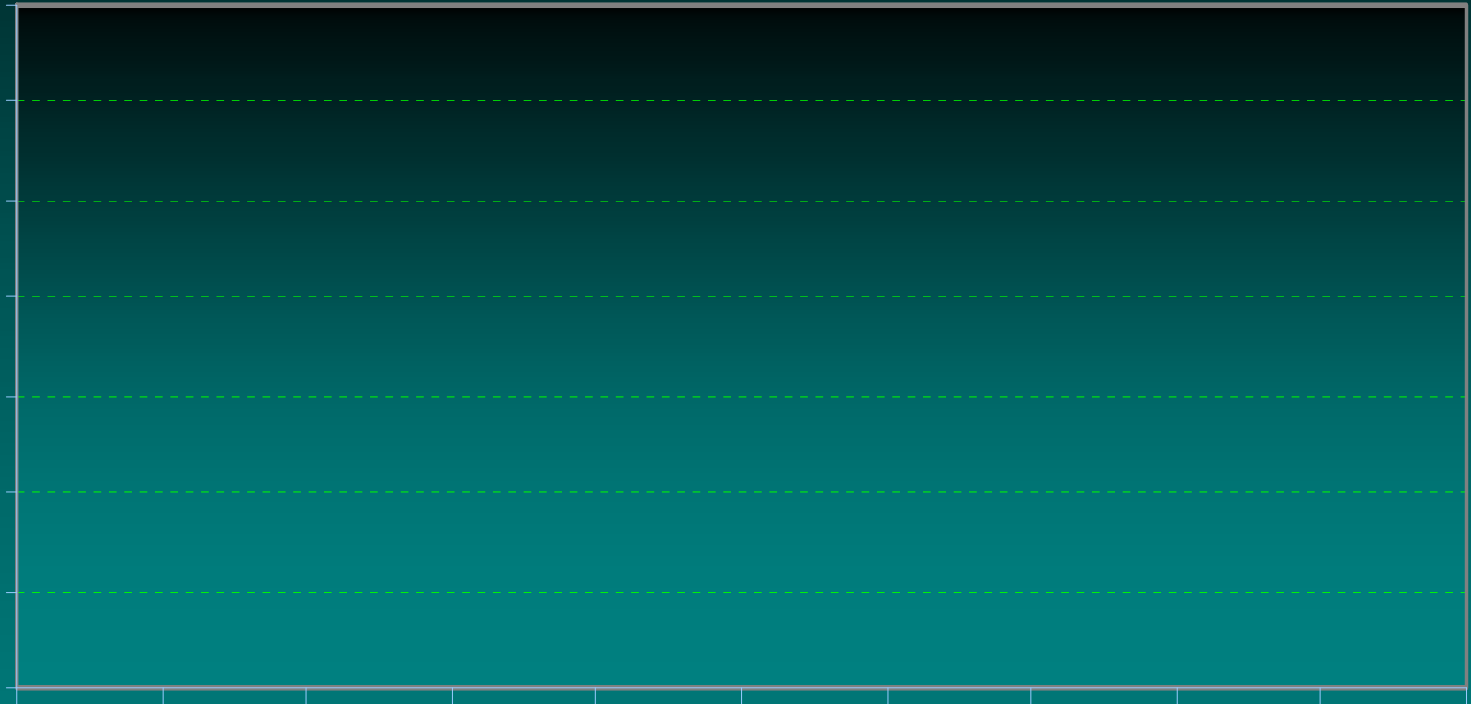

# Comparison of 2000 Rev with 2002 Rev projections of total fertility

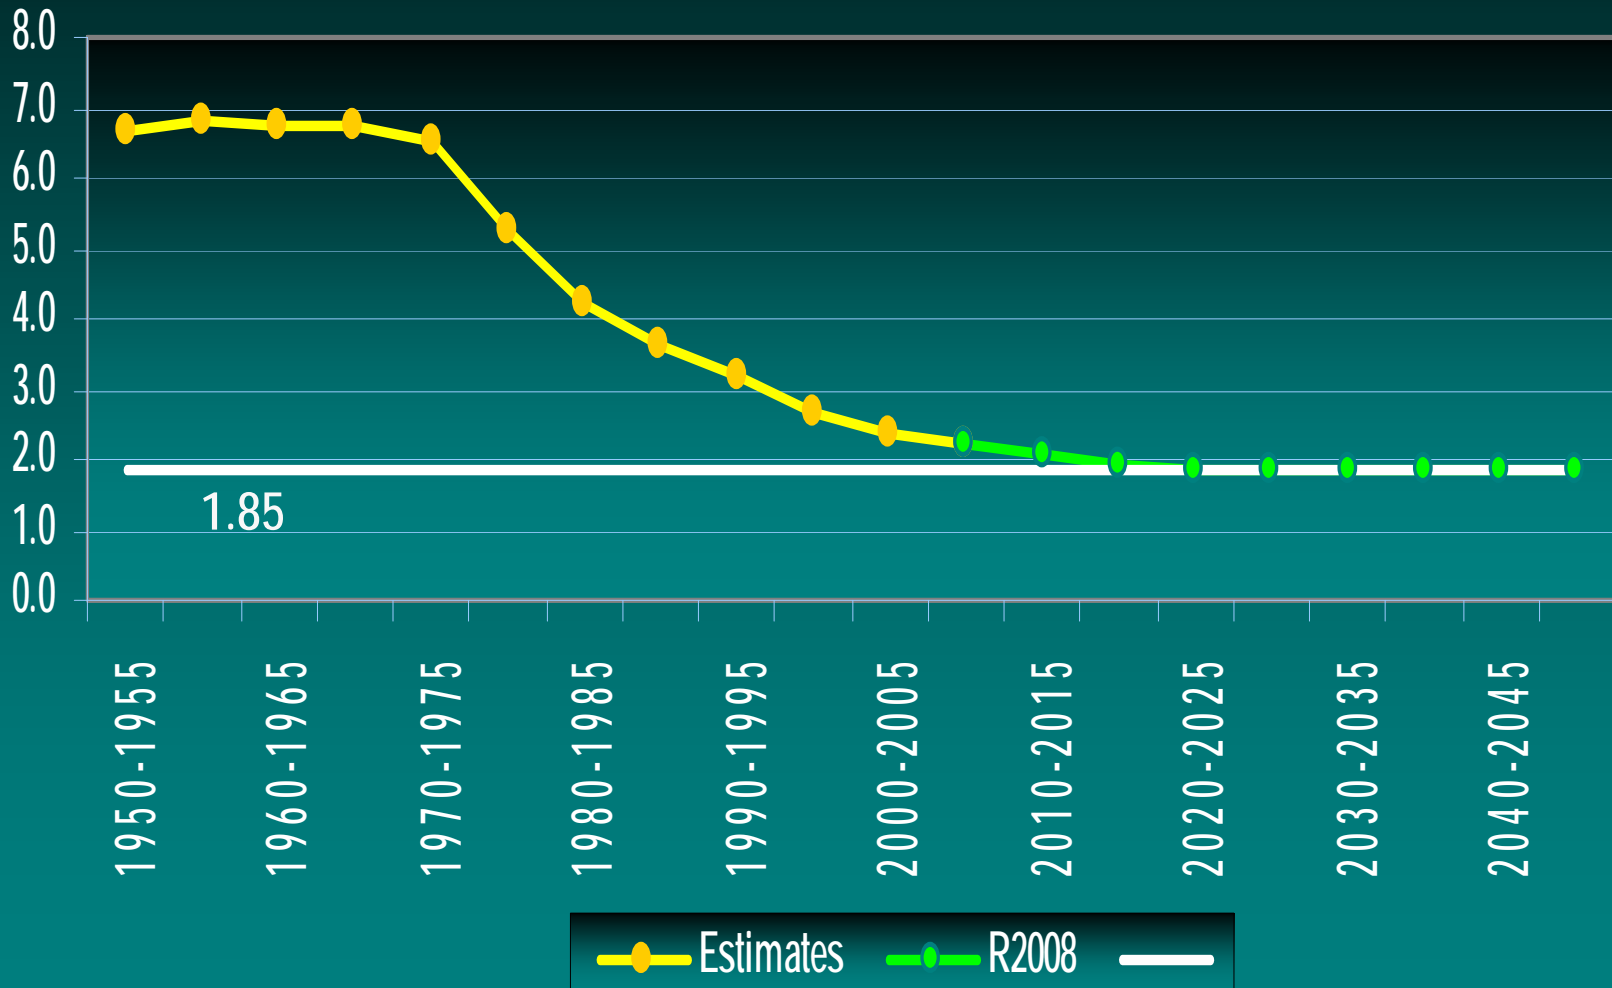

# Double logistic models: 2004 Revision

# Projection of total fertility starting above replacement

Some countries do not reach 1.85

A different approach is used  
for countries where  
fertility is already  
below replacement level

# Projection of total fertility starting at below-replacement level
