

Uses of the demographic evidence base for policy planning and programme monitoring

Wednesday, 13 April 2016 (3:00 pm – 4:30 pm)
United Nations Headquarters, Conference room 4, Conference Building

This panel will allow for an exchange of national and regional experiences in using demographic data and indicators in policy planning and programme monitoring. Traditional and new uses of demographic evidence to address development goals of the 2030 Agenda will be discussed.

Mr Bill Miller, Global Connections Television/Washington International

John Ssekamatte

Head, Population and Social Sector Planning, National Planning Authority, Uganda

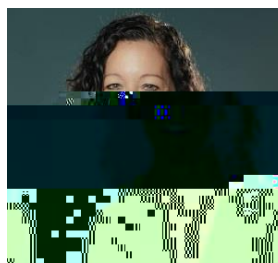

Vladimir Shkolnikov

Head of the Laboratory of Demographic Data, Max Planck Institute for Demographic Research, Rostock, Germany

Ann M. Starrs

President and CEO, Guttmacher Institute

Eduardo Clark

Director of Data for Development, National Digital Strategy, Office of the President of Mexico
