Slide 14:

May I again illustrate through Philippines' indicators on women and men some of these issues (disaggregation, source of data, access to data which all affect cost).

The PSA releases a factbook on women and men which

field of study for those who are technical /vocational courses come from administrative

based data of the Technical Education and Skills Development Authority.

In academic year 2013-2014, men in college tended to be in academic courses in Information Technology. They also tend to be in Information Technology even when they are in the technical/vocational trainings in 2013. Women on the other hand, tended to be in business administration in college and in Health, Social & Other Community

Development Services in technical/vocational trainings for the reference periods.

Slide 19:

Health and Nutrition Statistics come from various sources in the

•Regional

•Global

•NGOs/CSOs

•Academia

•Professional associations and networks

•Private sector

•PARIS21 and Global Partnership on Sustainable Development
