110 to 2020, the number of people with y education increased by 73.2% the number of years of education of the on over 15 years of education increased by d the illiteracy rate fell from 4.08% to 2.67% the new enrollment of colleges and ies in China exceeded 10 million. on census in 2020 shows that the on with university education in China is 220 million, accounting for 16% of the total on and 21‰f the population over 25 years n higher than some more developed

Mobilize the human resources among the elderly

- New definition of ageing and related indicators and research methods
- Gradual increase of retirement age (resistance from the public)
- Maximize the use of human capital and social capital of the elderly population
- life-long learning, enhance employability
- Increase health life expectancy, reduce the demand for long-term care
