

GHANA

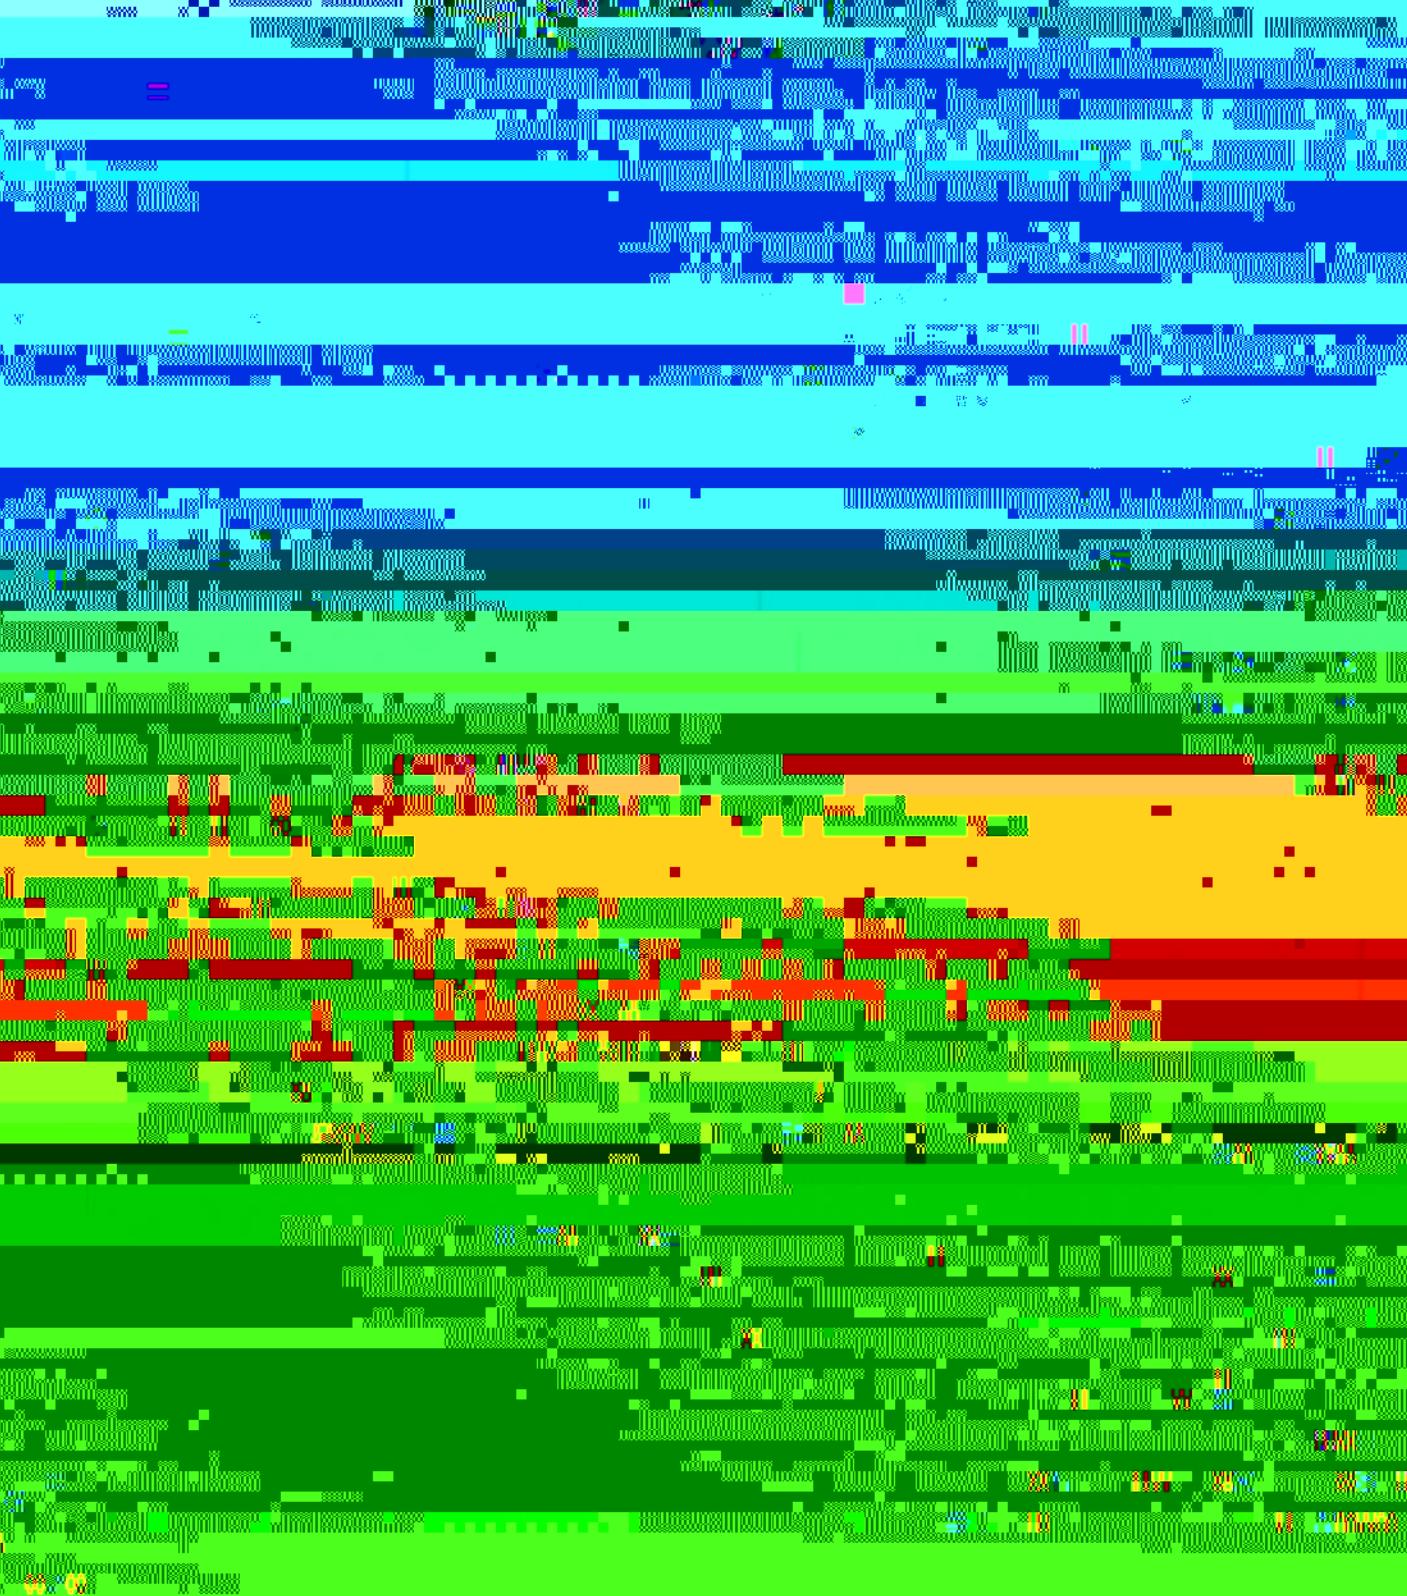

STATEMENT

FORUM AT THE UNIVERSITY

OF GHANA

Ladies and Gentlemen,

Ghana

effective and cohesive systems with

the following characteristics:

- **Widespread communication**:
A system is effective if it has widespread communication. This means that information is easily accessible and can be shared across different parts of the organization. It also means that communication is timely and accurate. This allows for better decision-making and faster problem-solving.
- **Clear roles and responsibilities**:
A system is effective if it has clear roles and responsibilities. This means that each person knows what they are supposed to do and how they are supposed to do it. It also means that there is accountability for actions taken. This helps to prevent confusion and ensures that everyone is working towards the same goal.
- **Consistent processes**:
A system is effective if it has consistent processes. This means that tasks are performed in a predictable and repeatable way. It also means that there is a standard way of doing things. This helps to ensure consistency and quality across all areas of the organization.
- **Continuous improvement**:
A system is effective if it has continuous improvement. This means that the organization is always looking for ways to improve its processes and procedures. It also means that there is a culture of learning and growth. This helps to stay competitive and relevant in a rapidly changing world.
- **Empowered employees**:
A system is effective if it has empowered employees. This means that employees are given the authority and resources to make decisions and take action. It also means that there is a culture of trust and respect. This helps to motivate employees and encourage them to do their best work.
- **Transparent decision-making**:
A system is effective if it has transparent decision-making. This means that decisions are made openly and fairly. It also means that there is a clear rationale for decisions. This helps to build trust and confidence in the organization.
- **Accountability**:
A system is effective if it has accountability. This means that people are held responsible for their actions. It also means that there is a culture of taking ownership and learning from mistakes. This helps to prevent complacency and ensure that everyone is working towards the same goal.

Modeling for and

regional climate models to implement the GCM, including well placed.

There is the need to strengthen international

cooperation in the field of climate modeling and

international climate policy making.

International cooperation in the field of climate

modeling and international climate policy making

are well placed.
