**STATEMENT BY THE REPUBLIC OF MALAWI DURING THE 1980'S**

The Secretary General,

Your Excellencies

I am honoured to represent

him. I would like to congratulate

the Government of Malawi

on their

successes.

Malawi

is a small

country in

Africa.

It has a

population of

about 10 million

people.

It is a

poor country.

Malawi is a developing country.

It is a member of the United Nations.

Malawi is a member of the Commonwealth.

Malawi is a member of the African Union.

Malawi is a member of the African Development Bank.

Malawi is a member of the African Union.

Malawi is a member of the African Development Bank.

Malawi is a member of the African Union.

Malawi is a member of the African Development Bank.

Malawi is a member of the African Union.

Malawi is a member of the African Development Bank.

Malawi is a member of the African Union.

Malawi is a member of the African Development Bank.

Malawi is a member of the African Union.

Malawi is a member of the African Development Bank.

Malawi is a member of the African Union.

Malawi is a member of the African Development Bank.

Malawi is a member of the African Union.

Malawi is a member of the African Development Bank.

Malawi is a member of the African Union.

Malawi is a member of the African Development Bank.

Malawi is a member of the African Union.

Malawi is a member of the African Development Bank.

Malawi is a member of the African Union.

Malawi is a member of the African Development Bank.

Malawi is a member of the African Union.

guiding tool that can help to

governance and cooperation.

It is also a way to increase the

efficiency of the system by reusing

existing knowledge and experience.

The Project Management System

is designed to support the

management of projects in a

structured and efficient manner.

It provides a central place for

all project-related information,

such as tasks, milestones, and

resources, and allows for easy

access and management of these

elements. It also includes features

for tracking progress, managing

risks, and communicating with

team members. Overall, the Project

Management System is a valuable

tool for anyone involved in

project management, providing

a structured and efficient way to

manage projects and achieve

success. It is a guiding tool that

can help to improve the efficiency

and effectiveness of project

management, making it easier to

achieve project goals and objectives.

The Project Management System

is designed to support the

management of projects in a

project management, providing

a structured and efficient way to

manage projects and achieve

success. It is a guiding tool that

is ahead of GCM, and Malawi is pleased to be a signatory of this important Protocol.

Malawi endorses the defining priorities that

\* Promote the well-being of our people, especially the poor,

\* Ensure that our environment is protected and sustainable,

\* Encourage the development of our agriculture,

\* Promote the development of our industry and services,

\* Encourage the development of our tourism and culture,

\* Encourage the development of our infrastructure and transport,

\* Encourage the development of our education and health sectors,

\* Encourage the development of our energy and water sectors,

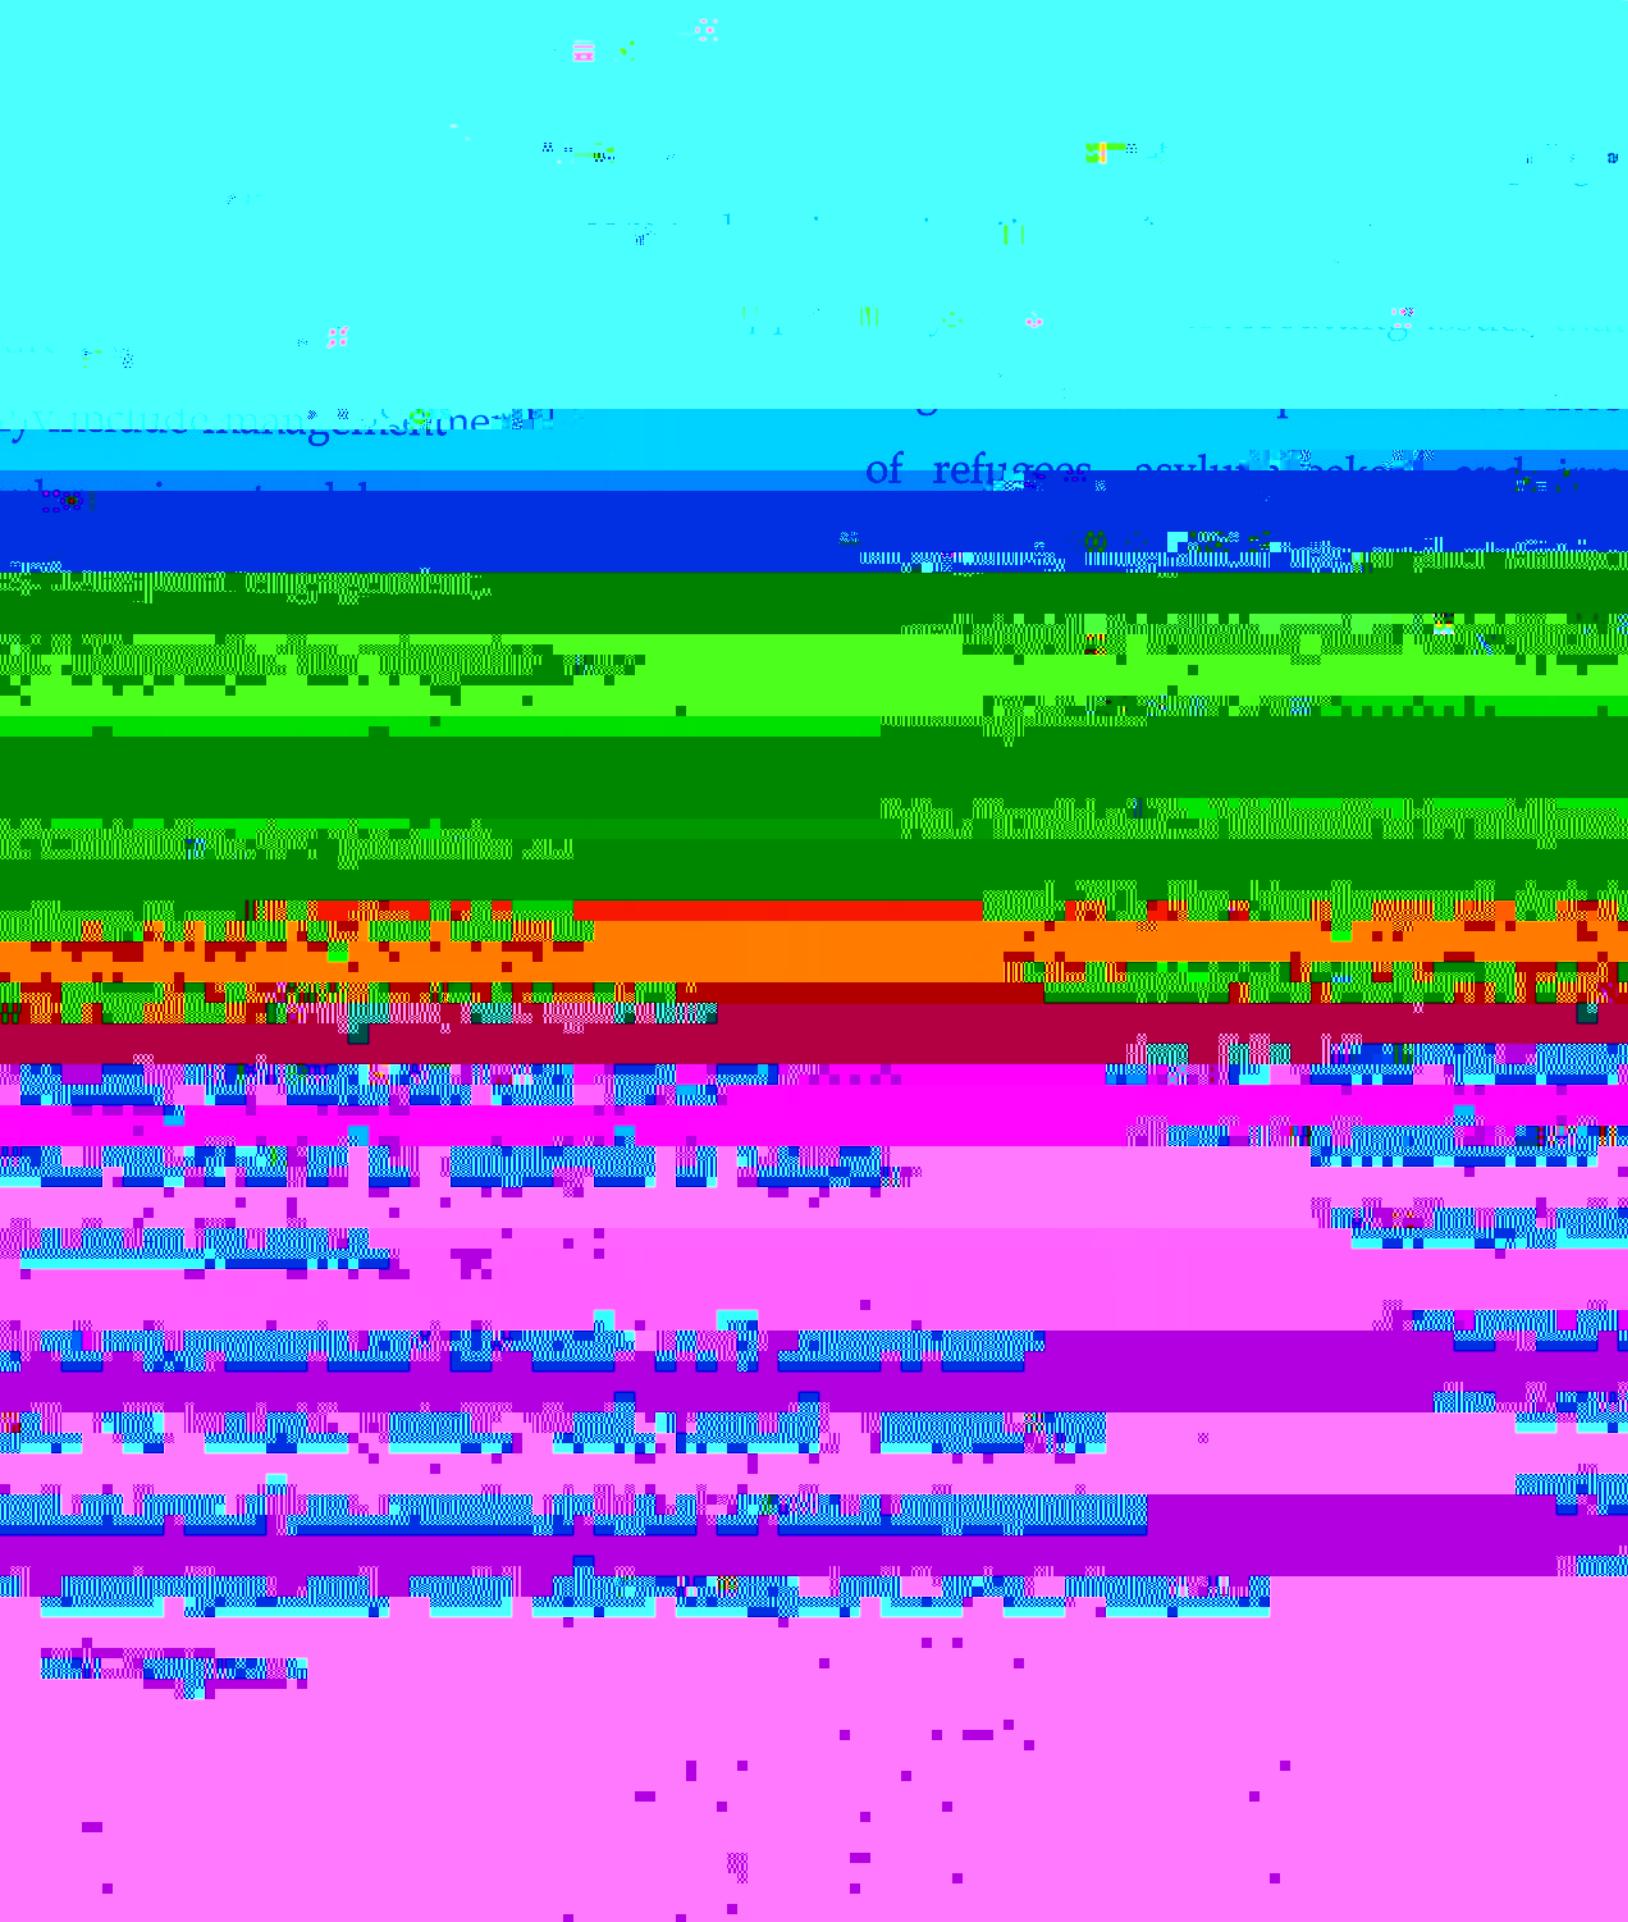

\* Encourage the development of our communications and information technology sectors,

\* Encourage the development of our financial and insurance sectors,

\* Encourage the development of our construction and building sectors,

\* Encourage the development of our mining and quarrying sectors,

\* Encourage the development of our food and beverage sectors,

Furthermore, Myc and c-Myc are required for the proliferation of the basal cell carcinoma cell line, A431, and the epidermal carcinoma cell line, NCI-H292. In addition, c-Myc is required for the proliferation of the fibroblast-like synovioma cell line, M14, and the fibrosarcoma cell line, HT1080. The requirement for c-Myc in the proliferation of these cell lines is consistent with the finding that c-Myc is required for the proliferation of normal keratinocytes. The requirement for c-Myc in the proliferation of these cell lines is also consistent with the finding that c-Myc is required for the proliferation of normal keratinocytes.
