THE NINTH REVIEW OF THE PARTIES TO THE TREATY ON THE NON-PROLIFERATION OF NUCLEAR WEAPONS

1 May 2015

## Main Committee I

Statement by H.E. John Quinn Ambassador and Permanent Representative of Australia to the United Nations

(Check against delivery)

Mr Chairman,

, W LV ZLGHO\ DFNQRZOHGJHG WKDW WKLV &RPF in achieving a successful outcome for the 2015 NPT Review Conference. We thus urge all delegations to work collectively anothstructively under \RXU OHDGHUVKLS WRZDUG WKLV HQG <RX KD endeavour.

Australia is a member of the Norroliferation and Disarmament Initiative (NPDI). This diverse, crossegional group of 12 countries shares a deep commitment to the NPT and to the goal of total elimination of nuclear weapons. We continue to urget nuclearweapon States (NWS) textively pursue nuclear disarmament in good faith.

NPDI emphasises comprehensive implementation of the 2010 NPT Review Conference Action PlanProgress across the three pillars has been variable; disarmament has clearly posed the most challenges, confirming that much of the sustained and difficult work to bring about a world free of nuclear weapons still lies ahead.

The building blocks of disarmament, elaborated in our NPDI papers, are well known. They include: increased transparency to build confidence and support further disarmament; entry into force of the CTBT; starting negotiations on, and concluding as soon as possaiblFMCT; reducing the operational status of nuclear weapons systems; diminishing the role of nuclear weapons in security policies; and reducing the number of non strategic nuclear weapons. Developing robust, widely accepted disarmament verification measures will also be an essential part of the process.

These measures will help create an en1 0 0 1 39[irsrupp 5

We see advancing the three principles of nuclear disarmament as a key component of a successful RevCon. Effective reporting on A200 of the NPT Action Plan is germane to the first transparency principle. While this obligation falls on all states, the biggest responsibility lies with the nuclear weapon states. We acknowledge the reporting efforts of the NWS at the Third PrepCom. However, this was always the baseline. Better and more regular reporting will also be fundamental to advancing the other two disarmament principlesverification and irreversibility.

We were an active member of the FMCT Group of Governmental Experts which adopted by consensus its groubmetaking report on 2 April. We VKRXOG QRZ OHYHUDJH RII WKH \*\*(¶V VHPLQD negotiations.

We renew our call upon all remaining Annex II States to ratify the CTBT without delay so that the treaty can **afily** enter into force. It is disappointing we still find ourselves some distance from achieving this longstanding priority goal.

Australia welcomes the renewed global focus on the humanitarian impact of nuclear weapons. It underpins all the work of the DNP and finds clear expression in the preamble of the NPT. Australia was pleased to goin 2 other states in a statement delivered by our Ambassador to the UN, Gillian Bird, on 30 April. We firmly believe that this must be an inclusive discussion that enges the NWS, and serves to strengthen rather than undermine the NPT.

How we assess progress, and set our future disarmament course is the core task of this Committee. The 2010 NPT Action Plan has provided a robust roadmap over the past five years. We efficient call on all states, and in

particular the Nuclear Weapon States, to forge at this RevCon agreement on forward looking, practical and realistic measures which reinforce and refresh the 2010 RevCon outcome.

Thank you Mr Chairman
