We welcome the milestone decision to entrust Working Group III with a broad mandate to work on the possible reform of investor-State dispute settlement (ISDS).
Despite the diversity of views offered, the mandate was decided by consensus. 5

example:

- First, they considered the desirability of reform, requesting the working group to develop and recommend relevant solutions to the Commission.
- Second, the Commission agreed that the working group deserves broad discretion in discharging its mandate, but that its proposed solutions should be designed taking into account the work of relevant international organizations, as well as the

adoption, and uniform interpretation of UNCITRAL texts in the region and the rest of the

information, knowledge and statistics through briefings, workshops, seminars,
publications, social media and information and communications technologies, including

in regional languages.

Thank you, Mr Chairman.
