CITES Appendices³³ now cover more than 30,000 plant species, of which more than 506 are tree-species, including rosewoods, cedars, and ebonies, to name a few examples.

In preparing the post-2020 Work plan, CPF members are also encouraged to take into consideration the following CITES provisions in effect after the 18th meeting of the Conference of the Parties (CoP18, Geneva 2019):

Resolutions Conf. 10.13 (Rev. CoP18) on the *Implementation of the Convention for tree species*, and 16.7 (Rev. CoP17) on *Non-detriment findings*³⁴; and Forestry-relevant Decisions³⁵, of which more than 15% are exclusively focused in strengthening the sustainability, legality and enforcement of the Convention for forestry species listed in the Appendices.

In particular, the following Decisions might be of special interest for CPF in the development of its post-2020 Work plan:

- 18.141 to 18.170 on the *Tree Species Programme*;
- 18.307-18.308 on the *Production of a CITES Checklist for Dalbergia spp.*;
- 18.79 on *Enforcement* (tree Task Force);
- 18.188 to 18.93 on *Wildlife crime enforcement support in West and Central Africa* (including African rosewood);
- 18.94 to 18.99 on *Malagasy palisanders and rosewoods and ebonies*;
- 18.140 to 18.143 and 16.58 (Rev. CoP18) on *Identification of timber and other wood products*;
- 18.203 to 18.204 on *Agarwood producing taxa*
