

In its Strategic Vision towards 2030, the Collaborative Partnership on Forests (CPF) envisions that: "by 2030 all types of forests and forest landscapes are sustainably managed, their multiple values are fully recognized, the potential of forests and their goods and services is fully unlocked, and the Global Forest Goals, the Sustainable Development Goals and other global forest-related goals, targets and commitments are achieved. To support countries to achieve these aims, CPF will effectively enhance coherence and synergy on forest-related issues and values among its member organizations and help move from deforestation to restoration."

The CPF work plan 2021-2024 was developed in early 2021 to support the realisation of this vision. The member organisations of the CPF developed the work plan based on guidance received from the United Nations Forum on Forests (UNFF) and other governing bodies. It is aligned with the United Nations Strategic Plan for Forests 2017-2030 (UNSPF) and the proposed Quadrennial Programme of Work of UNFF for the period 2021-2024. The plan promotes forests' contribution to the 2030 Agenda for Sustainable Development, other internationally agreed development goals, and the objectives of relevant global forest-related agreements and processes. The work plan will be revised once the United Nations Forum on Forests (UNFF) Quadrennial Programme of Work 2021-2024 is approved.

CPF in action

J1: Sustainable Wood for a Sustainable World

Lead agencies: FAO and ITTO supported by CIFOR-ICRAF, CITES, and the World Bank

Timeframe: 2018-2022

The principal goal of this JI is to strengthen sustainable wood value chains to enhance their social, economic, and environmental benefits from production to consumption. By setting up collaborative activities with a broad range of stakeholders along the value chain, the initiative advances responsible production and consumption of legally and sustainably produced wood, enhances the generation of socioeconomic benefits from forests, and increases the supply of low carbon products for a climate-resilient planet. This initiative supports selected countries to advance in sustainable and legal wood production and trade. In addition, it plans to launch a global communication campaign to promote the use of sustainably produced wood.

J1: Green Finance for Sustainable Landscapes

Lead agencies: CIFOR-ICRAF, GEF, and UNEP

Timeframe: 2021-2024

The initiative aims to boost bank and investor interest to increase capital flows towards forest and landscape restoration and deforestation-free agriculture. It further aims to create conditions for commitments to deforestation-free, sustainable commodity production and other forms of sustainable land use. This will be accomplished by releasing a framework including Key Performance Indicators; developing a standardized framing, measurement, and monitoring of environmental and social impacts related to agri/forestry loans and investments; and supporting agribusiness producer groups to better access business knowledge.

Jl: Communicators' Network

Lead agencies: CIFOR-ICRAF, CITES, FAO, UNFF

Timeframe: continuous

The CPF Communicators' Network facilitates actions to increase forest-related communication impact. It amplifies outreach activities of CPF members, events and coordinates strategic communication. It advises nationally on communication for development. It provides technical assistance to member countries in developing communication strategies. A Clearing House Mechanism was developed, and the initiative seeks to

JI (in the pipeline): Pathways for Designing a Mechanism to Incentivize Deforestation Free Landscapes and Value Chains for Green Growth

Lead agencies: World Bank and ITTO

Timeframe: TBD
