

FIRST MEETING OF THE PREPARATORY COMMITTEE FOR THE FIFTH  
UNITED NATIONS CONFERENCE ON THE LEAST DEVELOPED COUNTRIES

## IAEA SIDE EVENT ON THE DEVELOPMENT OF HUMAN AND INSTITUTIONAL CAPACITIES IN LEAST DEVELOPED COUNTRIES

Friday, 28 May 2021  
8:15–9:45 (EST) | 14:15–15:45 (CET)  
via Cisco Webex

The IAEA addresses the specific needs of least developed countries (LDCs) through its technical cooperation programme. There are 27 IAEA Member State LDCs in Africa, eight in Asia and the Pacific and one in the Caribbean. IAEA technical cooperation activities in these LDCs focuses on the peaceful use of nuclear science and technology in the following sectors: food and agriculture, health and nutrition, water and environment, energy, industry, and safety and security.

This side event will highlight IAEA support in building human and institutional capacities in LDCs, through education and training for technology transfer in a broad range of socioeconomic sectors. This enables LDCs to maximize the benefits of the peaceful use of nuclear technology for their socioeconomic development.
