

a deeper, countryresilience conditions

Allows for the identification of key policy and other actions to build resilience, including appropriately costed responses.

May provide a framework for managing and channeling international assistance to ensure that countries can better manage their vulnerabilities and build resilience to sustain progress and achieve irreversible gains.

for

Provide a detailed, multi-dimensional vulnerability and resilience at national level.

Articulate and recommend priority, integrated, and costed resilience building at national level.

Enhance, inform, and contribute to the formulation, implementation, and monitoring cycle of .

VROP development should be country-led and voluntary. Support for VROP

VROP should maintain a medium to long term development perspective, in accordance with the long-term national development plans of countries and should facilitate the use of a system thinking approach to resilience building, which allows a country to identify entry points where investments would have the greatest impacts.

VRCP should be based on evidence, informed by country-led evaluations and data which is high-quality, available, accessible, timely, reliable and disaggregated

VROP should allow the consideration of structural and non-structural indicators as well as quantitative and qualitative indicators of vulnerability and resilience.

- 1/ The MVI Custodian Body (once and if established) will be in charge of translating the set of agreed guiding principles into operational coordination modalities that each country will be able to use and implement based on its own national context.
- 2/ Those operational coordination modalities will be formulated hand in hand with the development of a VRCP handbook which will also be following the set of guiding principles outlined in this report, and which would enable the provision of detailed guidance to countries in terms of methodology and coordination.
- 3/ The production of a VRCP Handbook will be delegated to the Custodial Body for the MVI as an early output. The VRCP Handbook will also provide a standard structure for VRCP formulation in order to ensure consistency and comparability between VRCPs.
