8 June 2021

# Bioenergy for Sustainable Development

## Opening Remarks

Ivan Vera  
Senior Advisor

Division for Sustainable Development Goals (DSDG)  
UN Department of Economic and Social Affairs (UN DESA)

# Water and Energy

## Bioenergy for Sustainable Development

- Essential factors for achieving sustainable development
- Recognized in the 2030 Agenda with SDG 6 and SDG 7
- Water and Energy are strongly interdependent
- Sustainable Water and Energy Solutions are considered a necessary response for a more resilient future
- Sustainable bioenergy could support the social, economic and environmental dimensions of sustainable development in some countries around the world

# The Sustainable Water and Energy Solutions Network

A multi-stakeholder initiative created to promote a synergistic and integrated approach to water and energy to share practices and experiences to support capacity building activities and to mobilize and scale up action

Thank you
